

## **NATIONAL REPORT ON THE IMPLEMENTATION OF THE RAMSAR CONVENTION ON WETLANDS**

**National Reports to be submitted to the 12<sup>th</sup> Meeting  
of the Conference of the Contracting Parties,  
Uruguay, 2015**

Please submit the completed National Report in Microsoft Word format (.doc, 97-2003), as an electronic file (not a printed copy) and preferably by e-mail, to Alexia Dufour, Regional Affairs Officer, Ramsar Secretariat ([dufour@ramsar.org](mailto:dufour@ramsar.org)) by **1 September 2014**.

## The structure of the COP12 National Report Format

The COP12 National Report Format (NRF) is in four sections:

**Section 1** provides the institutional information about the Administrative Authority and National Focal Points for the national implementation of the Convention.

**Section 2** is a 'free-text' section in which the Party is invited to provide a summary of various aspects of national implementation progress and recommendations for the future.

**Section 3** provides the 66 implementation indicator questions, grouped under each Convention implementation strategy in the Strategic Plan 2009-2015, and with an optional 'free-text' section under each indicator question in which the Contracting Party may, if it wishes, add further information on national implementation of that activity.

**Section 4** is an optional annex to allow any Contracting Party that so wishes to provide additional information regarding any or all of its Wetlands of International Importance (Ramsar Sites).

## General guidance for completing and submitting the COP12 National Report Format

**IMPORTANT – PLEASE READ THIS GUIDANCE SECTION BEFORE STARTING TO COMPLETE THE NATIONAL REPORT FORMAT**

1. All Sections of the COP12 NRF should be completed in one of the Convention's official languages (English, French, Spanish).
2. The deadline for submission of the completed NRF is **1 September 2014**. It will not be possible to include information from National Reports received after that date in the analysis and reporting on Convention implementation to COP12.
3. All fields with a pale yellow background  must be filled in.
4. Fields with a pale green background  are free-text fields in which to provide additional information, if the Contracting Party so wishes. Although providing information in these fields is optional, Contracting Parties are encouraged to provide such additional information wherever possible and relevant, as it helps us understand Parties' progress and activity more fully, to prepare the best possible global and regional implementation reports to COP.
5. The Format is created as a form in Microsoft Word. You are only able to submit replies and information in the yellow or green boxes, as all other parts of the form are locked to ensure that the structure and wording of indicators will remain uniform and comparable for all Parties.
6. To select a yellow or green field you wish to complete, move the cursor over the relevant part of the form and left-click the mouse. The cursor will automatically move to the next field available.
7. To move down through the sequence of fields, you can also use the 'Tab' key on the computer keyboard.

8. For a 'free-text' field, you can type in whatever information you wish. Note that there is only limited facility within the Microsoft 'form' format to make editorial changes in the 'free-text' box once text has been entered. Therefore, if you wish to amend any of the text you have put in a green or yellow 'free-text' box, you should cut and paste the existing text into a separate document, make all the amendments, and then cut and paste the revised text back into the box.
9. Certain keyboard characters interfere with the automatic entry of data into the Secretariat's database. For that reason, please **do not use double quote marks " "** in the 'free-text' fields. Please **only use single quote marks ' '**. For the same reason, please **only use simple text in the 'free-text' fields: they cannot accept formatting, colours or objects such as tables and images.**
10. For each of the 'indicator questions' in Section 3, a drop-down menu of answer options is provided. These vary between indicators, depending on the question, but are generally of the form: 'Yes', 'No', 'Partly', 'In progress'. This is necessary so that statistical comparisons can be made of the replies.
11. For each indicator question you can choose only one answer. If you wish to provide further information or clarification, do so in the green additional information box below the relevant indicator question. Please be as concise as possible (**maximum of 500 words** in each free-text box).
12. To select an answer to an indicator question, use the Tab key, or move the cursor over the relevant yellow box and left-click the mouse. The drop-down menu of answer options will appear. Left-click the mouse on the answer option you choose, and this will appear in the centre of the yellow box.
13. An NRF is not usually completed by one person alone: for many indicators it is best for the principal compiler to consult with colleagues in their agency and others within the government and, as appropriate, with NGOs and other stakeholders who might have fuller knowledge of aspects of the Party's overall implementation of the Convention. The principal compiler can save the document at any point and return to it later to continue or to amend answers. Compilers should refer back to the National Report submitted for COP11 to ensure the continuity and consistency of information provided.
14. After each session, **remember to save the file** in Microsoft Word, .doc, 97-2003 format. A recommended filename structure is: COP12NRF [Country] [date], for example: COP12NRFSpain13July2014.doc
15. After the NRF has been completed, please **send it in this format to Alexia Dufour, Regional Affairs Officer, Ramsar Convention Secretariat, preferably by e-mail (dufour@ramsar.org).**
16. The completed NRF **must be accompanied by a letter or e-mail message in the name of the Head of Administrative Authority, confirming that this is the Contracting Party's official submission of its COP12 National Report.**
17. If you have any questions or problems, please contact the Ramsar Secretariat for advice (e-mail as above).

## SECTION 2: GENERAL SUMMARY OF NATIONAL IMPLEMENTATION PROGRESS AND CHALLENGES

**REMINDER: Please do not use double quote marks “ ”: use single quotes ‘ ’ instead.**

**In your country, in the past triennium (i.e., since COP11 reporting):**

**A. What have been the five most successful aspects of implementation of the Convention?**

- 1) Geomorphologically Bangladesh is a country of rivers, haors, baors, beels, lakes and plenty of artificially made dighis and ponds providing suitable habitat to a wide variety of resident and migratory waterfowls;
- 2) People dependent on the ecosystem of wetland for subsistence have been empowered to take management decision of the wetlands through implementing different projects.
- 3) Wildlife crime control unit with the involvement of different agencies started functioning and have been found effective to arrest poaching wildlife including waterfowls.
- 4) A large number of endangered species of international interest taking refuge in wetland of Bangladesh every year.
- 5) Valuation of Ecosystem services initiated to measure.

**B. What have been the five greatest difficulties in implementing the Convention?**

- 1) Increase of population and expansion of human habitats, agricultural and development activities through conversion of wetlands.
- 2) Indiscriminate regulation of flows of the river systems in the upper riparian areas and siltation due to degradation of watershed.
- 3) Natural calamities causing people more vulnerable.
- 4) Ignorance the values of forest and wetland ecosystem services causing budget constrain for conservation of natural resources.
- 5) Pollution of water due to industrial, urban, agrochemical and other types of pollutants including pollution from trans-boundary sources.

**C. What are the five priorities for future implementation of the Convention?**

- 1) Significance of wetlands in the national and local level planning process must be recognized.
- 2) Land zoning including wetland mapping has to be finalized and maintained by strict enforcement of necessary laws and rules.
- 3) At least 80% of hilly areas to be maintained under forest cover and payment realized from water user of the catchment areas can be distributed to the people for conserving the forests in the hills.
- 4) Declaration of critical wetlands as protected areas with the strict enforcement of law but without disturbing of ecosystem services of local people.
- 5) Strict protection of forests and wildlife of the country and periodic Census of local and migratory birds.

**D. Do you (AA) have any recommendations concerning implementation assistance from the Ramsar Secretariat?**

Technical and financial support towards Biodiversity assessment for RAMSAR sites.

E. Do you (AA) have any recommendations concerning implementation assistance from the Convention's International Organisation Partners (IOPs)? (including ongoing partnerships and partnerships to develop)

.Technical support for assessment of

1. Impact of withdrawal of upstream flows on ecosystem of Ramsar sites on which livelihood of people depends largely in Bangladesh
2. the causes of biodiversity loss due to factors beyond the control of Bangladesh.
3. Impact of Climate change and the extent of climate refuse population and take measures necessary by the International parties. .

F. How can national implementation of the Ramsar Convention be better linked with implementation of other multilateral environmental agreements (MEAs), especially those in the 'biodiversity cluster' (Ramsar, Convention on Biological Diversity (CBD), Convention on Migratory Species (CMS), CITES, and World Heritage Convention), and UNCCD and UNFCCC?

Creating synergies with other MEAs through appropriate institutional arrangement, interfocal point Coordination and adopting new policies and plans.

G. How can implementation of the Ramsar Convention be better linked with the implementation of water policy/strategy and other strategies in the country (e.g., on sustainable development, energy, extractive industries, poverty reduction, sanitation, food security, biodiversity)?

Through awareness building about the importance of Ramsar convention and strengthening the coordination among the policy makers.

H. Do you (AA) have any other general comments on the implementation of the Convention?

Meeting and discussion among the focal points of different countries may help better implementation of convention.

I. Please list the names of the organisations which have been consulted on or have contributed to the information provided in this report:

Forest Department, Department of Environment and IUCN.

## SECTION 3: INDICATOR QUESTIONS AND FURTHER IMPLEMENTATION INFORMATION

3. If you wish to amend any of the text you have put in a green 'free-text' box, you should cut and paste the existing text into a separate file, make the amendments, and then cut and paste the revised text back into the green box.
4. Some characters used in the free text box prevent the automatic data entry into our database National Reports. For that reason, **please do not use double quote marks “ ” in the free text boxes. Use single quotes ‘ ’. Text in the ‘free text’ boxes should be simple text only: they cannot accept formatting, colours or objects such as tables and images.**
